Jessica Rosenworcel
Commissioner

December 12, 2018

John Donovan, CEO
AT&T Communications
208 S. Akard Street, Suite 2954
Dallas, TX 75202

Dear Mr. Donovan:

Every American should have access to a phone system they can trust. Unfortunately, robocalls are a growing threat to the faith and confidence of the networks that consumers and businesses across the country rely on every day. Since the beginning of this year, the number of robocalls in the United States has increased by more than 75% and it has more than doubled since January 2017. This is unacceptable.

While I appreciate your company's efforts and coordination with the Federal Communications Commission to address this issue to date, I do not believe consumers and businesses can wait any longer for this situation to improve. Where technically feasible, I am calling on carriers across the country to make free tools available to assist with combating robocalls.

To that end, I kindly request that you provide a description of any tools to combat robocalls that you offer today, including a description of the costs charged, if any, to consumers. Please be specific in your response, including whether any tools that you offer to combat robocalls vary by service or feature(s) and the associated consumer costs, if any.

Please send your response to me via email (Jessica.Rosenworcel@fcc.gov) by January 14, 2019.

Sincerely,

A handwritten signature in blue ink, appearing to read "Jessica Rosenworcel", with a long horizontal flourish extending to the right.

Jessica Rosenworcel
